

October Guidance Lesson Theme:

Caring

Lesson focus...

Using manners is a simple way to show someone you care for and value them as a person. When we use manners when interacting with others, we are more likely receive that care and respectful behavior in return. In this lesson, students learned when and how to use different manners.

We practiced in class by...

- ♥ Students played the game, “What’s the manner?” in which they were given a scenario prompt and had to choose the answer that demonstrated using appropriate manners
- ♥ Students also created pictures of themselves using good manners and were prompted to share their artwork to initiate the practice and use of compliments and manners between one another.

Follow-up at home by...

Remind your child to use his/her manners at home. For example, saying “please” and “thank you” or covering his/her mouth when he/she coughs or sneezes or saying “excuse me” to get someone’s attention.

Sincerely,

Mrs. Levine, School Counselor
