Dear Parents/Guardians,

According to the State Guidelines for Student Health Services, examinations of students by a medical professional are recommended at certain developmental stages; Early childhood (pre-school through grade 3), Pre-adolescence (grades 4 through 6) and adolescence (grades 7 through 12).

We are recommending that you get a physical for your child at one of the above mentioned developmental stages prior to the September of the upcoming school year, if not already done. If you choose to obtain a physical for your child, please provide a copy of the physical to the school nurse in the building which your child attends. Updated information about your child will help us provide medical services that will better meet your child's needs.

Thank you for your cooperation in this matter.

Sincerely

Rosalie Preuss RN
